Product Description

Material Handling Equipment Large Driven Hydraulic Scissor Lift Working Platform

Product Description

Material Handling Equipment Large Driven Hydraulic Scissor Lift Working Platform

Mechanical data

Capacity	2000 kg
Lift stroke	4140 mm
Lifting time	32 s
Closed height	857 mm

This working platform is intended to be used for input and output of woodstrips and floor packages in warehouse.

The lift runs between two high racks on a driven flange wheel frame.

On top of the big lift we have a twin scissor lift with a roller conveyor, this lift serves as a working area for the operators, giving them an ergonomic working height.

This type of application we have delivered several times before to different companies working in the wood industry.
